

ZENDRIX B. RIVA

BSIT Student (4th Year) • Applied AI • Full-Stack Development • Mobile Engineering

Mandaue City, Cebu | 0909 188 9602 | zendrix.riva@cit.edu | github.com/zendrix-hub | linkedin.com/in/zendrix-riva

PROFESSIONAL SUMMARY

Final-year BSIT student with three built projects spanning Android development (Kotlin/MVVM), backend engineering (Spring Boot), and applied AI (RAG). Documentation-first approach — requirements specs, structured testing, containerized deployment — sustained by a multi-year habit of daily, self-directed study. Seeking a 500-hour OJT placement to contribute hands-on technical work within a quality-focused engineering team.

EDUCATION

Bachelor of Science in Information Technology (BSIT), 4th Year

Cebu Institute of Technology – University (CIT-U), Cebu City | Expected Graduation: January 2027

Relevant Coursework: Data Structures & Algorithms, Software Engineering, Systems Analysis & Design, AI & Machine Learning Fundamentals

TECHNICAL PROJECTS

playIT / BasaTrack — Mobile Phonics & Reading Literacy System

Project Manager & Core Android Developer | 5-member capstone team (2 core developers) | In Progress

Environment: Kotlin, Android (MVVM), Jetpack Compose, PocketSphinx, ExoPlayer, iText7

- Authored the v3.0 Software Requirements Specification (SRS) and Requirements Traceability Matrix, formally defining functional and performance criteria before development began.
- Led architecture of offline speech-recognition and Jetpack Compose UI within an MVVM structure, separating audio, UI, and data layers for independent testing and long-term maintainability.
- Directed project planning and task coordination across a 5-member team while personally driving core Android development alongside one co-developer.

ReadHub — Full-Stack Library Management System

Backend Developer | 4-member team | Deployed

Environment: Java, Spring Boot, Spring Security (JWT), Docker, Nginx, Cloudinary

- Architected a REST API in Spring Boot using a controller-service-repository pattern to handle authentication, book inventory, borrowing/returns, and dashboard analytics.
- Implemented secure, role-based authentication and endpoint protection using Spring Security with JWT validation.
- Containerized the full application stack with Docker Compose, orchestrating the Spring Boot backend alongside an Nginx web server for consistent deployment.

Gordon RamsAi — AI-Powered Fitness & Nutrition Chatbot

Core Developer (~80% of build) | 6-member team | Deployed

Environment: Python, Streamlit, Google GenAI, ChromaDB, Langfuse

- Drove roughly 80% of core development on a 6-person team, architecting the Streamlit application structure and page routing.
- Integrated Google GenAI with a Retrieval-Augmented Generation (RAG) pipeline using ChromaDB to ground fitness and nutrition responses in a custom knowledge base rather than relying solely on the base model.
- Built session handling and authentication modules to support a personalized user experience.

Live: gordon-ramsay.streamlit.app/

TECHNICAL SKILLS

Languages: Python, Java, Kotlin, SQL, JavaScript, HTML/CSS

Backend & Mobile: Spring Boot, Spring Security, REST APIs, Android (MVVM), Jetpack Compose

AI / ML: Google GenAI, Retrieval-Augmented Generation (ChromaDB), Langfuse, ML Fundamentals

DevOps, Cloud & Tools: Docker, Docker Compose, Nginx, AWS, Cloudinary, Git/GitHub, Android Studio, MySQL, Postman

CERTIFICATIONS & LANGUAGES

Certifications: AWS Academy Graduate — Cloud Foundations (20 hrs) & Cloud Architecting (Trained), credly.com/go/e84CaxMW; IBM SkillsBuild — Artificial Intelligence Fundamentals, credly.com/badges/a0c1b4ab-45eb-4e8c-9736-b7e00b66659e. Completed: OJT Etiquette Training (CIT-U / OpenLearning). Planned: PhilNITS FE.

Japanese: 1,200+ consecutive days of self-directed daily study (no certified proficiency claim)
